

Morley 10K Adjustment

The original turn around the traffic island needed to be moved at the request of the Highways Dept.

Calibration done (although not strictly necessary)

65400	70408	5008
68270	73279	5009
73360	78367	5007
78460	83468	5008
		Ave 5008

$5008 / 0.45 \times 1.001 = 11140$ counts/Km

Traffic island – new turn point = $28400 - 28593 = 193$ counts.

Finish lengthened by 2×193 . New finish =middle of Bentley's window (seam in paintwork).
